

TEAM ID	PNT2022TMID18589
PROJECT NAME	PERSONAL ASSISTANCE FOR SENIORS WHO ARE SELF RELIANT
TOPIC	NODE-RED

The screenshot shows the IBM Cloud console interface. The top navigation bar includes the IBM Cloud logo, a search bar, and links to Catalog, Manage, and the user's account (Varana Shree V's Acco...). The main content area is titled "Node RED PTCWR 2022-11-17" and includes an "Actions..." dropdown. The "Details" section on the left lists the App URL (<http://159.122.187.35:32422>), Source (<https://eu-gb.git.cloud.ibm.com/varanashreev/NodeREDPTCWR202...>), Resource group (Default), Deployment target (Kube/Helm), and Created date (11/17/2022). The "Services" section shows the Cloudant service with links to Open dashboard, Documentation, and API reference. The "Deployment Automation" section on the right shows the Name (NodeREDPTCWR2022-11-17), Location (London), and Tool integrations. The "Delivery Pipelines" section shows two pipelines: "ci-pipeline" with a Status of "Success" and "pr-pipeline" with a Status of "No stages detected".

The screenshot shows the Node-RED flow editor introduction page. The page has a dark red header. The main content area is white and contains the following text:

Node-RED is a programming tool for wiring together hardware devices, APIs and online services in new and interesting ways.

This instance is running as an IBM Cloud application, giving it access to the wide range of services available on the platform.

More information about Node-RED, including documentation, can be found at [nodered.org](http://nodered.org).

On the right side, there is a button labeled "Go to your Node-RED flow editor" and a link labeled "Learn how to customise Node-RED".

## Customising your instance of Node-RED

This instance of Node-RED is enough to get you started creating flows.

You may want to customise it for your needs, for example replacing this introduction page with your own, adding http authentication to the flow editor or adding new nodes to the palette.
